                                                                                                                                                                                                                                                                                                                                                                                                                                 Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             seq length: 0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Searched:
                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Capela D., Barloy-Hubler F., Gouzy J., Bothe G., Ampe F., Batut J., Bolstard P., Becker A., Boutry M., Cadieu E., Dreamo S., Gloux S., Godrie T., Goffeau A., Kahn D., Kiss E., Lelaure V., Masuy D., Pohl T., Portetelle D., Puehler A., Purnelle B., Ramsperger U., Renard C., Thebault P., Vandendol M., Weidner S., Galibert F.; "Analysis of the chromosome sequence of the legume symbiont Sinorhizobium mellioti strain 1021.", Proc. Natl. Acad. Sci. U.S.A. 98:9877-9882(2001).

- FUNCTION: ACTS AT TRANSFER OF MANNOSE GROUP TO A 3-DEOXY-D-MONO OCTULONIC ACID (KDO) VIA AN ALPHA-1,5 LINKAGE (BY SIMILARITY).

- PATHWAY: Lipopolysaccharide core biosynthesis.
                                                                                                                                                                                                                                     This SWISS-PROT entry is copyright. "Complete genome sequence of Salmonella enterica serovar Typhimurium
                                                                                                                                                                                                                                                                                                                                                                                                                                                 -!- PATHWAY: Lipopolysaccharide core biosynthesis.
-!- SUBCELLULAR LOCATION: PERIPHERAL MEMBRANE.
-!- SIMILARITY: BELONGS TO THE GLYCOSYLTRANSFERASE FAMILY 1.
-!- SIMILARITY: SOME, WITH B.SUBTILIS YTXN.
-!- SIMILARITY: SHOWS VERY LITTLE SIMILARITY TO E.COLI RFAK.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Lipopolysaccharide 1,2-N-acetylglucosaminetransferase RFAK OR WAAK OR STM3714.

Mol Gen. analysis of the waxy locus of Zea mays.";
Mol Gen. Genet. 203:237-244(1986).
I-I-FUNCTION: REQUIRED FOR THE SYNTHESIS OF AMYLOSE IN ENDOSPERM.
I-I-CATALYTIC ACTIVITY: UDP-glucose + {(1,4)-alpha-D-glucosyl}(N-1).
IDP + {(1,4)-alpha-D-glucosyl}(N+1).
IDP + {(1,4)-alpha-D-glucosyl}(N+1).
I-I-PANTHWAY: Starch biosynthesis.
I-I-SUBCELLULAR LOCATION: CHLOROPLAST, GRANULE-BOUND.
I-I-SIMILARITY: BELONGS TO THE BACTERIAL/PLANT GLYCOGEN SYNTHASE
FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             TGST_MAIZE STANDARD; PRT; 605 AA.
